

Lesson Challenge:

Are you ready? Given a CCSS mathematics standard in a WikiTask, create the learning strategies to help students learn the standard.

1. On your LearningFront homepage, click on **WikiTask** in your Tool Box and search **one** of the following keywords:

- CCSSMathElementary
- CCSSMathMiddle
- CCSSMathHigh

2. Add the WikiTask to your Task Folder, and, then, click “Wikilt” to open the WikiTask in your TaskBuilder editor -- click the “Standards Tab” to review the challenge standard.

3. Click on the Learning Link and select a template to develop your learning strategies in the TaskBuilder Editor -- or add your own strategies directly in the editor.

4. Develop and save your work. Then, **return to your Task Folder and click “Stop Editing”** to release the challenge WikiTask for another teacher to add strategies.

5. Check for feedback. Return to your Task Folder and click the WikiTask Title to see if other teachers have revised your strategies or added their own for you to review. Then, continue to edit the WikiTask or clone a copy to your Task Folder.

Update your CCSS Team! If you joined a CCSS Team in LearningFront, send a Team message to let your colleagues know about your WikiTask contributions.
