

Startup Innovation Action Plan (SIAP)

“Creative Thinking, Collaboration, and Innovation”

What is a SIAP?

A SIAP is an editable template for developing a disruptive innovation to improve teaching and learning. It is part of the LearningFRONT professional learning program entitled: *Creative Thinking, Collaboration, and Innovation*.

How is a SIAP created?

A SIAP Team uses the results of program practice activities, coaching feedback, and their own ideas to complete the template components. The template is supported by the LearningFRONT tool known as TaskBuilder.

How is a SIAP shared?

Each SIAP Team creates a TaskBuilder WikiTask to develop and share its disruptive innovation in the LearningFRONT professional learning community and other social learning platforms.

SIAP Template Components

Challenge:

Develop new rules, layouts, goals, and raves for improving learning.

Overview:

Describe data that support a disruptive innovation to meet the challenge.

Disruptive Innovation:

Create a disruptive innovation: Features, functions, tools, scenarios, and branding.

Payoff:

Identify benefits and results envisioned for the disruptive innovation.

Action:

Plan the key activities to launch, improve, and market the disruptive innovation.

Budget:

Estimate the costs and revenue needed to support the disruptive innovation.
